

The Fastest Installation in Its Category

AI Series
FRESH AIR SYSTEMS

**INTRODUCING
VIRTUO AIR TECHNOLOGY**

BROAN®

Installing fresh air systems has never been so simple.

Forty years in the industry has taught us a few things, like the details that can make all the difference to an installer. This is why we turned our classic fresh air ventilation line into a single and versatile platform: the **AI series**. A platform specifically designed and improved to make your life easier and more profitable, in addition to offering superior air quality to your customers.

Quicker Setup

SAVES YOU UP TO 20 MINUTES PER UNIT

Our new **VIRTUO technology** does the airflow verification and balancing for you, eliminating two complex parts of the installation process. All of the settings have been simplified while the straightforward system makes it fast and easy to train the homeowner.

Consistent Results

NO UNEXPECTED SURPRISES

Simpler installation results in greater consistency in the installer's work. **Auto-balancing** sets a reliable initial configuration in all dwelling types, and self-adjustment ensures the unit operates at optimal performance levels throughout its lifetime.

Satisfied Users

EASE OF OPERATION

High-quality installation brings **peace of mind** for homeowners. User-friendly operation and additional automatic options and features allow users to easily draw maximum benefits from the units.

Your Smart Built-In Assistant

Making your life easier. Saving you time and money.

Introducing the most advanced smart technology that allows a ventilation system to do an airflow verification and auto-balance in all dwelling configurations and to self-adjust to changing indoor and outdoor conditions.

Stay on Duty, Even After You Leave

CONTINUOUS SELF-ADJUSTMENT

With VIRTUO, you can rely on a monitoring system designed to preserve the quality of your work. When a pressure change occurs, VIRTUO detects it and instantly adjusts the unit operation to consistently deliver the right CFM value. 100% BALANCED. Always.

Older generations of ventilation systems are balanced in maximum or minimum speeds, meaning they are only perfectly balanced in one or the other ventilation speed. With the continuous self-adjustment, the AI Fresh Air System stays balanced 100% of time, whatever the ventilation speed used, providing the homeowner with the optimal energy recovery/savings and comfort.

END USER PEACE OF MIND MEANS FEWER CALLBACKS

VIRTUO only has one thing on its mind: the homeowner's comfort. It maintains optimal indoor air quality and comfort without any action required from the homeowner. In addition, by preventing positive and negative pressure imbalances that could damage the building envelope, VIRTUO protects the property integrity and value.

A Key Member of Your Installation Team

AUTOMATIC AIRFLOW VERIFICATION AND AUTO-BALANCING

VIRTUO performs a complex part of the installation work for you. Thanks to its smart auto-balancing system, the AI series analyzes and communicates the maximum achievable air flow for both exhaust and supply flows through its LCD screen. The calibration is achieved quickly and maintained throughout the life of the product, with superior accuracy.

ELIMINATE STEPS IN THE INSTALLATION PROCESS

No need to adjust or fine-tune balancing dampers, pressure taps or pressure gauges, thanks to VIRTUO Air Technology.

24/7

Trained to Only Make the Right Decisions

A TESTED ALGORITHM THAT ENSURES HIGH PRECISION

VIRTUO's intelligence was thought out, programed and tested to maximize the full potential of the state-of-the-art components assembled into every AI series unit. It uses fine motor speed adjustment capabilities to adjust ventilation with utmost precision. Its dynamic data analysis ensures fluid interaction between sensors and motors.

ENERGY SAVINGS AND INDOOR AIR QUALITY, 24/7

VIRTUO is nimble. It makes quick decisions based on a series of indoor and outdoor factors such as temperature and humidity. With real-time detection, it generates quick adjustments and automatically optimizes air quality around the clock. This quick action also minimizes energy consumption for the homeowner.

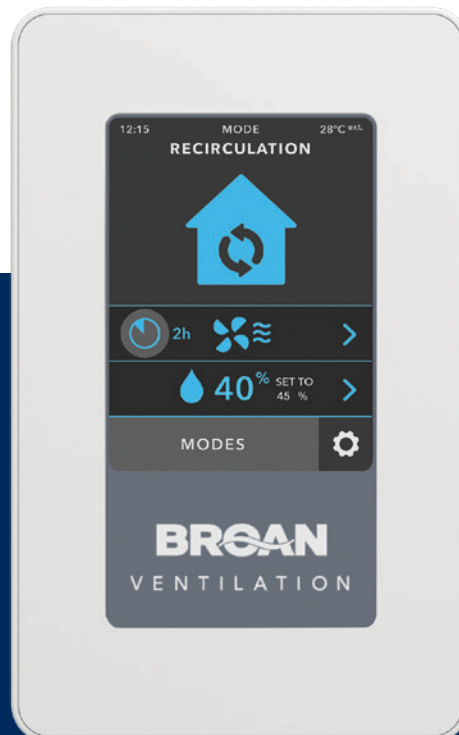

Making Your Day Productive

No detail is too small. Our ultra-compact, **universal platform** design fits everywhere, gives you all the features you need and is quick to install, easy to get up and running and simple to use.

Giving Users Full Control

When things are simple,
everything is so much
easier.

Advanced Touchscreen Control
VTTTOUCHW

User-Friendly Design

EASIER FOR HOMEOWNERS

Touchscreen technology provides advanced support and information for a greatly enhanced user experience

EASIER FOR INSTALLERS

Advanced control used to determine the air flow makes setup faster and easier, and time-saving preconfigured setup program

Well-Thought Design

COMPACT DESIGN AND STANDARDIZED
SIZE AND SHAPE TO FIT ALL APPLICATIONS
SIMPLIFIED SERVICING AND MAINTENANCE

Proven Core Durability and Performance

UP TO 75% SRE, TESTED UNDER
EXTREME CONDITIONS (-31°F)
AVAILABLE WITH HRV/ERV CORE

Small but Powerful

160 CFM IN AN ULTRA-COMPACT
DESIGN

Superior Air Filtration

HIGHER FILTRATION PERFORMANCE
TO ANSWER GROWING CONSUMER
AND CODE REQUIREMENTS

COME STANDARD WITH MERV 8
FILTERS: CAPTURE MOLD SPORES
AND FINE DUST, FOR CLEAN AIR

MERV 13 FILTERS AVAILABLE AS AN
OPTION: CAPTURE MOLD SPORES,
FINE DUST, BACTERIA AND SMOKE,
FOR CLEANER AIR

Premium ECM Motors with Built-In Smart Technology

COME WITH PMSM ECM MOTORS,
THE MOST EFFICIENT AND
RELIABLE ON THE MARKET

PROVIDE UP TO 60% ENERGY SAVINGS
ULTRA-QUIET PERFORMANCE

Versatile Installation Options

UNIVERSAL BRACKETS ALLOW
FOR CHAIN, HORIZONTAL
OR VERTICAL WALL-MOUNT
INSTALLATION
